

7600 Series UV Curable Ink

For Inca Eagle, Columbia Turbo & Spyder , Durst Rho 160, 205 & 600, L&P Virtuprint 36 & 72

- Up to 40% Savings over OEM Ink
- Low Draw Forming and Heat Bending
- Superior Adhesion and Edge Chip Resistance on Popular Rigid Materials

- Excellent Flexibility properties
- Fast Curing Formula

Nazdar Lyson Series 760 Series Inks are a true alternative to Original Equipment Manufacturer (OEM) ink sets for use in the Inca Eagle, Columbia Turbo & Spyder, HP Nur Tempo (I, II & Q), and, Teckwin Teckstorm and Gandhi 1224 & 3150 Models, offering expanded substrate compatibility with improved adhesion, formability and bending capabilities with industrial materials such as styrene, PETG and Polycarbonate. Lyson 760 series offers expanded color gamut to the current OEM ink set, so profiling will maximize your available colors. Unattended printing is safe and reliable with our no clog, fast curing formula. Our outdoor performance matches that of the OEM ink and, as with all Lyson branded solutions, you will realize substantial cost savings over the OEM product. Let us show you how an ink solution can be less expensive to operate than an OEM system. Our inks can be installed quickly and easily with the help of Nazdar certified technicians.

You will find the Lyson brand interwoven in the history of nearly every inkjet printer manufacturer currently offering products to the market. Nazdar continues to enjoy our position as a manufacturer of ink for a number of OEM partners. Developing inks since 1922, Nazdar offers more experience and R&D expertise than any other ink company.

Nazdar is known for products that push the envelope of color and performance in the ink jet world and continues to develop products that challenge the industry. Our customers have made us aware of the need for products that outperform the color capabilities of the OEM ink, bringing new life to your printer and to your output.

Nazdar products offer cost competitive and reliable alternatives to OEM ink. We proudly offer our Lyson branded products as the most reliable and technically advanced in the industry. Keep an eye on Nazdar and the Lyson brands as more new, innovative and essential products are sure to come.

With the industry's strongest third party warranty, you'll take comfort in knowing that Nazdar stands behind every drop of Lyson digital ink that it supplies. Nazdar's warranty states that if Lyson inks are ever proven responsible for the breakdown of a digital printer, Nazdar will provide reimbursement for the cost required to repair any damage to the ink train.

Special Notes:

- *Because Lyson 760 is a softer and more malleable ink designed for maximum flexibility, special care should be taken to avoid storing prints in a horizontal stack due to the potential for blocking and offsetting of ink.*
- *Use of this ink on porous material (pressure sensitive vinyl and scrim banner vinyl) will result in blocking and is not recommended.*

NAZDAR®

- LWU760KK5L - Black 5 ltr
- LWU760CY5L - Cyan 5 ltr
- LWU760MA5L - Magenta 5 ltr
- LWU760YE5L - Yellow 5 ltr
