

# 1302 Series

## For Mimaki JV3 Digital Printers

**Low odor formulation**

**Revised color match to latest Mimaki SS2 inks**

**No profiling necessary in most situations**

**Compatible with OEM ink (SS2)**

**Simple no-mess change over**

**Reliable unattended printing**

**Substantial savings over OEM ink**

Nazdar's Lyson® Series 1302 Inks are formulated to closely replicate the latest version of Mimaki SS2 inks. Due to Mimaki moving from a true solvent to a low solvent formulation, Nazdar can now provide an equivalent ink set with 1302 Series. This not only means excellent color reproduction, but also the same low odor characteristics.

Lyson 1300 Series will still be available for those who require a more aggressive alternative to Mimaki SS2, but still want to take advantage of Nazdar color matched ink systems.

Our cartridges are 100% compatible and install just like your OEM cartridges. Unattended printing is safe and reliable with our no clog, fast drying formula. Our display longevity performance matches that of the OEM ink and, as with all Lyson® branded solutions, you will realize substantial cost savings over the OEM product.

You will find the Lyson® brand embedded in the history of nearly every inkjet printer manufacturer currently offering products to the market. Nazdar continues to enjoy the position as a preferred inks manufacturer to a number of OEM partners. As one of the most experienced ink development companies in the world, Nazdar offers more knowledge and R&D expertise than any other ink company in the market today.

Nazdar is known for products that are at the leading edge of color and performance in the ink jet world.

While we continue to develop innovative new products, we are very aware of the market requirement for products that very simply match the characteristics of the OEM offering.

With the industry's strongest third party warranty, you'll take comfort in knowing that Nazdar stands behind every drop of Lyson® digital ink that it supplies. Nazdar's warranty states that if Lyson® inks are ever proven responsible for the breakdown of a digital printer, Nazdar will provide reimbursement for the cost required to repair any damage to the ink train.
